

D4000A™

Arthroscopic Resection System with Irrigation

Features and Benefits

*ConMed's next generation of powered instrument consoles for arthroscopic resection, the **NEW D4000A** has intuitive features that deliver new levels of simplicity, versatility and performance.*

Easy-to-Use Interface

Designed to provide intuitive functionality, the D4000A dual touchscreen interface allows users to quickly and simply adjust a wide range of settings. Now adjusting the oscillation settings happens with the touch of a finger – eliminating inconvenient and time-consuming DIP switches.

Automatic Fluid Adjustment

For a seamless clinical experience, the D4000A is directly integrated with ConMed's 24k® Pump. This means that these two units will effortlessly work together to automatically detect and adjust fluid levels – helping to maintain the surgical site and aid clinical visualization.

Plug & Play Performance

Featuring two plug and play handpiece ports, the D4000A provides continuous, uninterrupted power. This console provides peak performance for both handpieces – even during simultaneous use at maximum RPMs.

OR Versatility

A versatile console, the D4000A supports 31 handpieces, 5 languages, features built-in wireless connectivity to support multiple wireless foot controllers and allows for customizable user-profiles that let users save their preferred settings.

Integrated Irrigation & Cooling

The D4000A features a standalone pump with irrigation or handpiece cooling for ENT applications. This console is also IEC 60601 3rd Edition compliant.

Ordering Information

Description	Catalog Number
D4000A Arthro Power Console	D4000A
